WD1 Watch Scanner

Ensure that data storage and processing are more mobile than ever with our Android-based smartwatch, the WD1.

While the design and weight are similar to a consumer smartwatch, the WD1 is specifically designed for harsh working environments. With a 2.8" capacitive touch, Android 9 GMS, a 3.300 mAh battery, WiFi and 4G, it's the perfect companion.

The WD1 touchscreen offers easy and fast input to navigate intuitively through applications.

The remappable side button and shortcuts make the watch user-friendly and easy to operate.

To complete your hands-free solution, via Newland's EasyConnect software you can easily pair the WD1 with our other NWear devices, WD2 and WD3.

ACCESSORIES
Straps & Sleeve

WD2 Wearable Scanner

Multitask with the WD2 wearable scanner! With its comfortable hand strap, the WD2 ensures no wasted time on putting away a device while picking or moving boxes. The scanning trigger can be easily activated with a light press of the thumb. The strap, available in two sizes, is designed to fit both the left and right hand and can be worn over gloves in colder operating temperatures.

With its embedded Acuscan technology, the WD2 catches distorted or closely placed barcodes, minimizing errors and improving productivity. Its compact size and lightweight design reduce fatigue for users.

The WD2 also comes with a compact 2-bay charging cradle which can be connected to form up to a 10-bay multi-docking station charged via a single PSU.

WD3 Wearable Badge

WD3 is a feather-light badge scanner that packs high-performance in a compact yet sturdy design. You can choose to use the scanner as a stand-alone device or wear it on a lanyard as a badge. No matter which method you pick, the lightweight WD3 ensures reduced weariness and uninterrupted workflow to make your everyday tasks easier to perform.
